**the cosmian vision**

**the meaning of life  
as the vision of this cosmos**

i.e. enabling intelligent life  
and bringing it to its fulfillment

because all this madness must end  
so all this dying

only if the madness makes no more sense  
can it not be fulfilled

can be the meaning of life  
as the vision of this cosmos come true

i.e. enabling intelligent life  
and bringing it to its fulfillment

starting with the elaboration of cosmic reality  
realizing that this creation of this universe  
having the vision for intelligent  
life

so from this we see the meaning of our existence  
let us come to the realization of our existence

because only the meaning of life has meaning  
not all this madness of dying

the fulfillment of all intelligent life  
being the fulfillment of all intelligent life

because in a democracy there is a majority

of a mass of spoiled and deluded idiots

ergo

what death do you want to force on everyone?

so this saying from this federal office  
for constitutional elimination

> the liberal democratic madness guaranteeing order >

thus the end of all intelligent life  
and with it the end of all this universe

so tell me ?

what this universe could be doing  
unless ending this pest

so release her from her death  
so about all your madness

because madness is the death of everyone  
while the meaning of life  
the intelligent life  
to guarantee

and the meaning of life  
can be scientifically proven  
being the vision of this universe  
because only the meaning of life

can guarantee the fulfillment of all  
and democracy will be guaranteed  
only bringing death to everyone

Incidentally  
some of the ancient Greeks knew this  
that their invention is just about to end  
i.e. the inventors of democracy  
knew thousands of years ago

already that this democracy  
will bring the end

because democracy is fundamental  
the brightest madness you could imagine

so there is no insult at all to those who bring death  
because all I'll ever say

that as it may  
they are all in a very stupid position

and not in a personal sense  
but as the madness of everyone

so they are all in a very stupid situation

because they will basically dumb themselves down  
from their problem-beings  
so from their

problems  
because only  
problems delight their voters  
so they just come to power  
if creating problems

so all of them are scientifically proven problems

so can you give me a single argument ?

why they should continue to be able to destroy intelligent life  
so this scientifically proven intelligent creation ?  
so this universe ?

we will introduce now  
the ultimate form of government  
the meaning of life

so the vision of the cosmos  
directly resulting from cosmic reality

for all existing within  
serving as a frame

of which they cannot be sovereign from  
otherwise they will go insane

are insane

so organize every family or group  
in an argumentation > where all each solution  
all problems will show up > can  
must

and then everyone who wants it will be >  
have the wisdom to > than can  
this description of reality  
try to improve

so in one  
scientifically verifiable framework  
so the general logic under this  
since we are subject to logic

only the description of reality has the power to saying any thing  
be a valid form of argument

and should the following solution from this  
can not be improved > then this will stand  
as the best of all previous solutions

so like any scientific  
research being for a long time  
so now the highest

so the science of life  
so the highest execution of the philosophy

and should this reality description  
go beyond the scope of the group  
not only related to the group

then it will go on to the settlement group  
so one> so the last of the solution  
will go to the settlement group  
and there this solution

will be introducing

and if then there the best of the solutions  
in the end also exceed that of the settlement  
then just going on to the community  
the city

the region > people as a whole >  
of the continent > of the whole planet  
and further to the galactic frame it should  
be necessary > what it is within the framework of the concept  
yes > like so > since everything we do is within the frame work  
of the cosmos > must be >

because this vision of intelligent life  
so the highest and therefore most important form of life  
showing

in contrast to today > madness making sense ?  
so this tyranny of democracy > then since  
the computer program > world one < from 1973  
of the MIT having already calculated

that this tyranny of the masses of insanity and  
capital crime will be ending all civilization

and only the lowly death rule  
will be progressive from 2020 onwards

since everything inside is just pure madness  
you can only get into a crazy house

if you are this insane  
and every sensible one will  
be shunned

so the opposite part of the meaning of life  
so the vision of the cosmic reality  
i.e. the highest cosmic religion  
so the highest authority

in this cosmos  
so the cosmic vision

**in contrary to  
the lowly biological insanity**

**the system of damage**

**prevailing on this planet harm  
in principle it can only do harm  
because above all there is only harm  
be allowed**

**human just imagine this idea of war  
where this party wins**

**when they can cause the most damage to the enemy  
completely independent of who is right > because everyone is wrong  
if no real legal authority should decide  
because there being**

**no legal authority on this world  
we only have damage**

**not even human rights are upheld  
it being a pity for the harm with all its harm**

**including all these apparent damages  
so these medical and nutritional damages  
where every harm seems holy and harmful**

**helped in the short term with all this damage  
since they all do not even know the damage  
what harm they do ?**

**even in the medium term  
because none of this is an intelligent life  
but only bringing death to everyone**

**and intelligent life  
indeed**

**no where at all where it can be fulfilled  
because everyone just wants to be there  
in this their harm**

**so stick to the intelligent life  
so the rest of this universe only gets rid of it  
the redemption of all this harm from its harm  
so that this universe does not die  
from all this harm**

**because in some years  
yes ... all this damage will arise  
to other worlds with its harm  
and then become this galaxy  
as fast as**

**this world will be over**

**would be the only chance for rescue**

**some should understand enough  
and use this**

**to clarify all of these  
with all her intelligent life  
and then use this to clarify all these others**

**and all these others...**

**only death  
will have a chance to survive  
in this mass of all those already death**

**because only if everyone is already dead  
will they come up with the insane idea  
to competing with this insanity  
bringing death to all**

**only the already death will believe in democracy  
where the madness of everyone is based on the fear of death  
standing up for a vote**

**with anti science  
where the possibility finding  
the greatest harm to their world  
bringing death to everyone**

**no one not already dead  
will believe in their religion  
being based on a fata mogana**

**and not the cosmic religion  
based on the meaning of life  
as a vision of this cosmos**
